SUMMARY

Motivated Flutter Developer with a strong background in mobile application development, eager to apply my skills and experience to make a valuable contribution to a dynamic development team.

SKILLS SUMMARY

Languages and Tools: Dart, Flutter, BLoC, GetX, Firebase, Hive, RESTful APIs, Clean Architecture, MVC Pattern, Jira, Figma, Git, GitHub, Node js, Typescript, Prisma, MongoDB, socket.io, Postgres, CI/CD.

Soft Skills: Excellent Communication, Troubleshooting, Problem Solving, Decision Making, Team Collaboration

WORK EXPERIENCE

BlackTech Pvt. Ltd (Flutter Developer)

December 2024 - Present

- **RestroX (Restaurant Management System)**

- Developed a full-fledged restaurant management system with seamless API integration.
- Enhanced UI/UX for better user experience.

- **Simple Patro (Nepali Calendar App)**

- Built a Nepali calendar app with localized features.
- Integrated custom date calculations and event notifications.

Self Project

- **Arthasetu (Business and finance management app)**

- Developed backend in TypeScript and Node.js.
- Designed and implemented an enhanced UI with full Flutter integration.
- Implemented core inventory management, finance management , chatting and attendance features with seamless frontend-backend interaction.

Skybase Innovation. (Flutter Developer)

September 2024 - November 2024

- **Blinkr App (Social Media App)**

- Integrated socket communication for real-time messaging.
- Successfully deployed the app with optimized backend communication.

- **Trip Haru (Trip Sharing App)**

- Integrated socket communication for real-time messaging.
- Successfully deployed the app with optimized backend communication.

- **Aarambha HRM App (Attendance System)**

- Integrated RESTful APIs into the attendance system and created a user-friendly design.
- Completed all the necessary setup for the app, from development to final preparations, and the deployment process to the App Store and Google Play Store is currently underway.

Everest Technologies (Flutter Intern)

April 2024 - June 2024

- **Restropoint App (Restaurant Management System)**

- Integrated RESTful APIs for seamless backend communication.
- Added several functionalities and implemented custom design elements to enhance user experience.
- Implemented features such as user management, restaurant details, adding restaurants, roles and permissions, password changes, KOT print functionality, customer management, transaction handling, and location-based functionality using Flutter Maps.

- **CV Maker App**

- Successfully transformed a 40-page Figma design into a functional Flutter UI for my first project.
